# DID YOU GET A COVID-19 VACCINE?

BOOST YOUR PROTECTION

If you are 12 or older, you should **get a booster dose as soon as you are eligible** — even if you already had COVID-19.

Boosters make your vaccine protection last even longer. In January 2022, vaccinated and boosted individuals were almost **15x less likely to be hospitalized than unvaccinated individuals**.

15X LESS LIKELY TO BE HOSPITALIZED
